MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS AND FINANCIAL REVIEW

The Group has a vision of becoming a smart interactive entertainment product provider. The Group is principally engaged in the design, development, manufacture and sale of high-quality smart toy vehicles, smart interactive toys and traditional toys and the sale of smart hardware products.

Revenue

The Group's total revenue decreased by approximately 9.2% from approximately RMB325.8 million for FY2019 to approximately RMB295.9 million for FY2020. In light of the outbreak of the coronavirus disease 2019 (“**COVID-19**”), there was adjustment in focus in different major markets by the Company. The Company took the initiative to reduce its sales to markets in Europe and the United States of America (the “**US**”) which are places more seriously affected by COVID-19, resulting in a decrease in the amount and proportion of revenue attributable to direct sales to such overseas customers.

The People's Republic of China (the “**PRC**”) continued to be the Group's biggest market in 2020, contributing approximately 65.6% of revenue (among which, approximately 47.7% was indirect sales to overseas made through the export-oriented wholesalers based in the PRC which principally export and sell toys to overseas wholesalers and retailers and mainly onward export the Group's products to the overseas market (the “**PRC Export-Oriented Wholesalers**”), while approximately 17.9% of which was domestic sales made through the PRC domestic-sale-oriented wholesalers and retail sales in the PRC market). Europe as a whole contributed approximately 10.8%, the North America contributed approximately 18.0%, Asia (excluding the PRC) contributed approximately 3.9% and approximately 1.7% came from Oceania, South America and Africa.

Analysis of revenue by product type is as follows:

Smart toys

Smart toy vehicles

The Group's smart toy vehicles mainly comprise full function radio controlled toy vehicles, which are manufactured in different scales. During FY2020, the Group's smart toy vehicles were mostly "kidztech" brand products and co-branded products collectively released by the Company and renowned automobile manufacturers. The Group also manufactures under overseas customers' brands on original equipment manufacturing ("OEM") and original design manufacturing ("ODM") bases.

Smart interactive toys

The Group's smart interactive toys mainly comprise smart interactive playsets, activity toys and musical toys, and some of these toys which play music and contain play features are intended to stimulate the sensory development of children. During FY2020, most of these toys were sold under either (i) co-branded with popular entertainment characters featured in animated television series or motion pictures or toy brand owner; or (ii) the "kidztech" brand.

Traditional toys

Traditional toys include traditional toy vehicles, traditional educational toys, dolls and other traditional toys such as outdoor and sport as well as infant toys. During FY2020, (i) the majority of revenue from traditional toys were derived from sale of traditional toy vehicles, which include pull back toy vehicles and inertia toy vehicles which are mainly designed for children aged one to three years or above; and (ii) most of these toys were sold under the “kidztech” brand.

Smart hardware

Leveraging the expertise of the Group in designing and manufacturing high quality radio controlled smart toy vehicles, the Group had in 2018 commenced selling smart hardware, such as Bluetooth speakers, which are sold under the “kidztech” brand. As the domestic internet industry giants all use smart speakers as products to build the entry of smart home series product chains, they have all launched new products. They all adopted subsidy policies in order to seize market share, so prices continued to fall while the competition remained fierce. As a result, the sales profit margin did not reach the expectation of the Group, and no sales had been achieved during FY2020. The Group will continue to seek sales opportunities for other smart hardware products.

Brands

The Group’s smart toys, traditional toy and smart hardware products are (i) branded with its “kidztech” brand; (ii) co-branded with renowned automobile manufacturers, popular entertainment characters featured in animated television series or motion pictures or toy brand owner; or (iii) branded under its overseas customers brands, which mainly represent the products manufactured by the Group on ODM and OEM bases and the products sold to its customers branded under their respective brands.

During FY2020, (i) approximately 67.1% of revenue was attributable to products under the “kidztech” brand (FY2019: approximately 46.0%), (ii) approximately 23.6% of revenue was attributable to products under co-brand (FY2019: approximately 45.3%) and (iii) approximately 9.3% of revenue was attributable to products under overseas customers brands (FY2019: approximately 8.7%).

The Group believes that co-branding with other famous brands allows the Group to leverage on the marketing benefits of the internationally renowned brands to expediently gain consumer awareness, and recognition of authenticity, and to establish creditability and market acceptance from the mass market. The Group has been newly granted licensed rights of renowned toy and entertainment character brands in FY 2020 as set out below:

- (i) licensed rights of “Pac-Man” for the sale of a series of radio controlled toys and slot racing track sets in overseas market for the period from 1 May 2020 to 30 April 2023 (both days inclusive); and
- (ii) licensed rights of “X-Games” for the sale of radio-controlled skateboarders in the overseas market for the period from 1 July 2021 to 31 December 2022 (both days inclusive).

Anti-epidemic products

Since the outbreak of COVID-19, there has been a shortage of anti-epidemic products. The Group believes that on the one hand, the timely development of the anti-epidemic products business allows the Group to participate in the global anti-epidemic work, and on the other hand, it allows the Group to take advantage of the continuous growing domestic and foreign demands which provides the Group with income diversification and enhances the returns of the shareholders of the Company (the “**Shareholders**”). Since late March 2020, the Group has been actively preparing for the establishment of mask production lines in the PRC and the sales and trading of anti-epidemic products. In June 2020, Kidztech Intelligent was verified and confirmed by the Guangdong Provincial Development and Reform Commission as a Key Anti-Epidemic Materials Production Enterprise in Guangdong province and also achieved sales revenue in FY2020.

Gross profit and gross profit margin

The Group’s gross profit decreased from approximately RMB122.2 million for FY2019 to approximately RMB100.2 million for FY2020, representing a decrease of approximately 18.0%. The Group’s gross profit margin decreased by approximately 3.7% from approximately 37.5% in FY2019 to approximately 33.8% in FY2020. Due to the impact caused by COVID-19, the Group adjusted the focus in different major markets and took the initiative to reduce sales to markets in Europe and the US which are more seriously affected by COVID-19, resulting in a decrease in revenue. The amount and proportion of revenue attributable to direct sales to overseas customers that have higher gross profit margin dropped, resulting in a decrease in gross profit and gross profit margin.

Profit for the year

The Group's net profit decreased by approximately 29.4% from approximately RMB51.8 million for FY2019 to approximately RMB36.6 million for FY2020. The Group's net profit margin decreased from approximately 10.9% for FY2019 to approximately 8.2% for FY2020. Due to the impact caused by COVID-19, the Group adjusted the focus in different major markets and took the initiative to reduce sales to markets in Europe and the US which are more seriously affected by COVID-19, resulting in a decrease in revenue. The amount and proportion of revenue attributable to direct sales to overseas customers that have higher gross profit margin in revenue dropped, resulting in a decrease in net profit and net profit margin.

If the expenses for the one-off listing of the shares of the Company (the "Share(s)") on the Stock Exchange (the "Listing") were excluded, the Group's adjusted net profit margin for FY2020 was approximately 12.4% (FY2019: approximately 15.9%).
